

# 3D STAR THEATER

3D Planetarium Projector

**AA/LR6 x4** Batteries not included  
Requires 4 x 1.5V AA/LR6 batteries

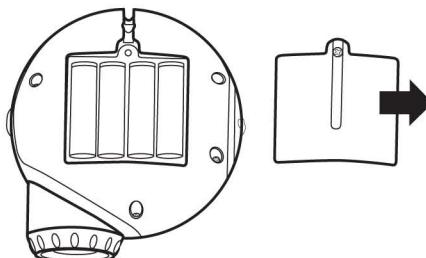

**CAUTION:**

Do not look directly into the light source.  
Doing so can cause serious and irreparable  
eye damage.

**BATTERY INSTALLATION**

Tool required - Small Phillips head screwdriver

1. Using a Phillips head screwdriver, remove the battery cover as shown.
2. Insert 4 "AA" batteries as indicated in the battery compartment and replace cover.

**BATTERY SAFETY INFORMATION**

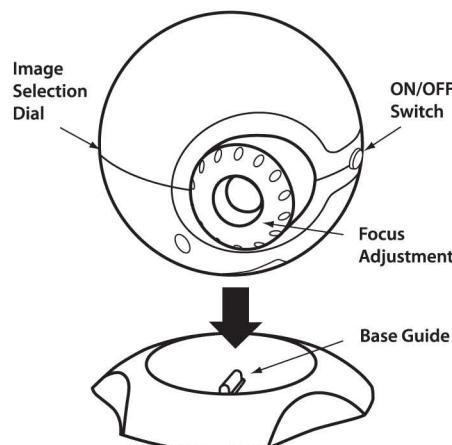

- Non-chargeable batteries are not to be recharged
- Rechargeable batteries are only to be charged under adult supervision
- Rechargeable batteries are to be removed from the toy before being charged
- Different types of batteries or new and used batteries are not to be mixed
- Batteries are to be inserted with the correct polarity
- Exhausted batteries are to be removed from the toy
- The supply terminals are not to be short-circuited

**IMPORTANT:** For best 3D image projection,  
use in a completely darkened room.

3D glasses are only for viewing 3D images.  
Do not wear for long periods of time or  
while performing physical activities. Not to  
be used as sunglasses.

**SET UP AND OPERATION**

1. Use the product in a room with a smooth white wall or ceiling.
2. Place the projector unit in the base, aligning it with the base guide as shown. You can now position the projector unit at the desired angle.
3. The projector should be about three to five feet from the projection surface.
4. Focus as needed turning by the Focus Adjustment.
5. Rotate Image Selection Dial to select image.
